1.21 - Gold Master Release 2.3 - July 2022

Stemmons Central Gold Master version 2.3 was released on July 2022 to resolve some reported issues.

Cases:

Optimize performance on Export All Fields to Excel for list with large dataset.

Cast:

Add option to filter the assignment based on "Owner Of". For example: Cases can be generated and assigned to all Entity Type Owners, Case Type Owners, Standards Book Owners, etc.

Entities:

1. Fix issue with merging special character field values in Document Generator.
2. Photo Gallery image is no longer distorted in Entity View Page.
3. Allow file up to 25 MB to be attached in Single File and Multiple File.
4. Correct issue in group constraint.
5. Correct issue with cascading in Entities Import Tool.
6. Correct issue with search in Entity Role Association grid when multiple columns are configured to show on grid.

Facts:

1. Optimize sync process for FACTS_CASE_LIST.
2. Sync User Information to Facts for reporting purposes, including Role Associations. The following new tables are added to Facts for reporting purposes:
 1. FACTS_USER_CACHE: Contains information about the user.
 2. FACTS_MANAGER_CONFIG: Contains manager associated to the user.
 3. FACT_ENTITY_ROLE_ASSIGN: Contains all user's role assignments.
 4. FACTS_ENTITY_ASSIGN: Contains all user's entity associations (without role).
 5. FACTS_ENTITY_ENT_TO_ENT_ROLE_ASSIGNMENT: Contains entity to entity role associations (for example, a contact associated with an opportunity a Salesman)

Quest:

1. Correct issue with export to PDF with special characters in Spanish.
2. Correct issue where the help context was wrapped incorrectly.

Advance Search:

Correct date filtering issue in the result grid.

Thank You ...
