1.1 - Gold Master Version 1.4 - March 2017

We are proud to announce that Stemmons Central GM 1.4 Release is now available with a few major features added.

The whole Central Application Suites were uplift with a new fresh user interface and are now mobile enabled! Some other major features are added to Cases, Quest, Cast, Home.

We are proud to announce that Stemmons Central GM 1.4 Release is now available with a few major features added. The whole Central Application Suites were uplift with a new fresh user interface and are mobile enabled. Some other major features are added to Cases, Quest, Cast, and Home.

Complete list of added features are noted below.

1.1.1 - GM 1.4 - Feature List

1.1.1.1 - New User Interface for Central Application

Feature Name: [New User Interface for Central Application](#)

Applications: [All Applications](#)

We have come up with fresh look with completely revamped user interface.

How it works:

The screenshot displays the Stemmons Central web application interface. At the top, there is a navigation bar with the logo and the text 'BPM-S-1.4'. To the right of the logo are several icons representing different modules: Cases, Inlets, Departments, FACTS, Quest, and Standards. Below the navigation bar, there are two main sections: 'Case List' and 'Quest List'. The 'Case List' section has filters for Case Type, Status, Priority, Assigned To, and Created By. Below the filters are 'Apply Filter' and 'Clear Filter' buttons. A table below the filters shows a list of cases with columns for Case ID, List ID, Case Type, Title, Status, Priority, Case Life, Due Date, Created By, and Owned By. The 'Quest List' section has filters for Area and Created By, and an 'Inspected By' dropdown. Below the filters are 'Apply Filter' and 'Clear Filter' buttons.

The screenshot displays the mobile application interface. At the top, there is a blue header bar with the text '1002-1 Schedule QA of GM 1.4'. Below the header bar is a toolbar with various icons representing different actions: Save, Save & Exit, Refresh, Attach File, Re-Open, Resolve & Exit, Copy Link, Send Email, Alert Me, Take Ownership, Assign To Me, Assign Approv..., Forward Approv..., Activity Log, Visual Log, Get MTR, Permissions, Export To PDF, and Assign To.

1.1.1.2 - Mobile Applications - Android & I-OS

Feature Name: [Mobile Application for Android & I-OS](#)

Application: [All Applications](#)

Stemmons Enterprise Clients and Users are now able to access their Stemmons Central Environment via Mobile.

The screenshot displays the mobile application interface. At the top, there is a blue header bar with the text '5:52'. Below the header bar is a large white area with the Stemmons Central logo on the left and the text 'Central To Go' on the right. Below the logo and text is a text input field with the placeholder text 'Add Service Name'. Below the input field is a button with the text 'Go'.

1.1.1.3 - Custom Folder - Home Page
 Feature Name: Add a Custom Folder - Home Page

Applications: [Home Application](#)

This feature allows the company to customize the Home Page based on User's job responsibilities. Once the templates are set up, the templates can be associated with the individual via Entity Role. A Role can be associated with multiple templates and the User will be able to switch between templates as needed.

How it works:

1.1.1.4 - Help Icon to Show Field Description in all Applications
Feature Name: Help Icon to Show Field Description

Applications: Cases, Entities, Departments, Quest and Cast

During the configuration of Cases, Entities, Departments, Quest, and Cast, the description given to each fields in the Configuration is now available to the Users in the front-end applications. The field description is accessible via the info icon next the individual data field.

How it works:

Create New Case

1.1.1.5 - Hide Button on Ribbon in Cases and Entities
Feature Name: Hide Button on Cases and Entities Ribbon

Applications: Cases & Entities

Cases and Entities are predefined with a preset default buttons. There are some buttons which may not be applicable or meaningful for a specific Case Type or Entity Type. During the configuration of the Case Type or Entity Type, Admin Users now are able to hide those buttons from the Ribbon Menu.

How it works:

Expandable Text Field

Oceans and lakes have much in common, but they are also quite different. Both are bodies of water, but oceans are very large bodies of salt water, while lakes are much smaller bodies of fresh water. Lakes are usually surrounded by land, while oceans are what surround continents. Both have plants and animals living in them. The ocean is home to the largest animals on the planet, whereas lakes support much smaller forms of life. When it is time for a vacation, both will make a great place to visit and enjoy.

The Blue Whales just played their first baseball game of the new season, I believe there is much to be excited about. Although they lost, it was against an excellent team that had won the championship last year. The Blue Whales fell behind early but showed excellent teamwork and came back to tie the game. The team had 15 hits and scored 8 runs. That's excellent! Unfortunately, they had 5 fielding errors, which kept the other team in the lead the entire game. The game ended with the umpire making a bad call, and if the call had gone the other way, the Blue Whales might have actually won the game. It wasn't a victory, but I say the Blue Whales look like they have a shot at the championship, especially if they continue to improve.

1.1.1.7 - Capability to Assign Cases via Entity Role Assignment in Cases
 Feature Name : Assign To Cases: Capability to Assign Cases via Entity Role Assignment in Cases
 Application : Cases

This feature allows the User to assign the cases based on the entity role assignments. This is made available for the user with a button "Assigned To" on the ribbon menu.
 How it works:

CONFIGURATION > CASES - CASE TYPES > CASES - CASE FIELDS (PROPERTY WORK ORDER)						
ID	Field Type	Name	Description	System Code	Order	External Datasource
