

Release 2.6.1.1

Release Date: March 17, 2025

The focus of this release is introducing the new reporting tool. We are removing Syncfusion Reports as the default reporting tool and replacing it with Power BI.

The client can choose to use their own Power BI Gateway or to use Power BI Embedded that comes with our software.

With this release, all clients' custom reports were being converted from Syncfusion to Power BI.

Syncfusion reports would no longer be available.
